Projects

Text Summarizer

Jul 2026 - Aug 2026

- Developed a **local extractive text summarizer** using **Python, Streamlit, and NLTK** without APIs or cloud services.
- Implemented **tokenization, stop-word removal, and text normalization** for NLP preprocessing.
- Built a **word-frequency-based scoring algorithm** to rank and select important sentences.
- Created an interactive **Streamlit UI** with summary length, word count, and clear/reset features.
- Enabled **offline, lightweight summarization** after initial NLTK resource setup.
- Github Repository:** <https://github.com/Vanshul-Thakur/text-summarizer>

Stock Price Prediction App

May 2026 - Jun 2026

- Developed a full-stack **stock price prediction application** with a responsive frontend using **React, Vite, and Tailwind CSS**.
- Built **FastAPI (Python)** backend services for stock data processing, API integration, and machine learning model inference.
- Implemented and compared **Linear Regression and LSTM models** to predict future stock prices.
- Integrated **Supabase PostgreSQL** for efficient storage and retrieval of historical stock data and prediction-related information.
- Created interactive visualizations for **historical prices, predicted prices, and market trends**, enabling users to analyze model predictions through an intuitive interface.
- Github Repository:** <https://github.com/Vanshul-Thakur/stock-prediction>

Expense tracker (Mobile Application)

Nov 2026 - Oct 2025

- Developed a cross-platform Expense Tracker mobile application using **React Native** and **JavaScript (ES6+)**.
- Implemented add/delete transactions with real-time calculation of total income, expenses, and net balance.
- Managed application state using React Hooks (**useState, useEffect**) and structured reusable components for clean architecture.
- Utilized **AsyncStorage** for local data persistence to maintain user transactions across sessions.
- Github Repository:** <https://github.com/Vanshul-Thakur/expense-tracker>

Technical Skills

Programming Languages: C++, Java, Python

Technologies/Frameworks: React, React-Native, FastAPI

Tools: GitHub, Redux, Firebase.

Machine Learning: Data preprocessing & basic model training.

Core: Linux, Git, OOP, DSA.

Certificates

Python for Data Science

Dec 2024 - Jan 2025

IBM (Cognitive Class / IBM Developer Skills)

Web development (PHP)

Dec 2021 - Jun 2022

Jetking

Achievements

Third Prize – Model making in the Science and Tech fair.

Oct 2025

Secured 2nd Position in Annual Inter-Department Programming Competition

Aug 2024

Education

Lovely Professional University

2025-2027

Master of Computer Applications | CGPA: 7.83

Punjab

Baddi University

2022 - 2025

Bachelor of Computer Applications | CGPA: 8.04

Himachal Pradesh

Mount Maurya International School

2019 - 2020

12th(Science) | Percentage: 59%

Himachal Pradesh

Mount Maurya International School

2017 - 2018

10th | Percentage: 56%

Himachal Pradesh
